SUMMARY

Information Technology student at the University of Mindanao with hands-on experience building database-driven web, desktop, and mobile applications through coursework and a capstone project. Comfortable with C#, PHP, Python, React Native, and SQL databases, with a foundation in UI design using Figma. Seeking entry-level software development or IT opportunities to apply my skills and keep growing in a real-world environment.

EXPERIENCE

University of Mindanao, Courseworks Project

Aug 2022 - Present

- Developed a Clinic Management System as part of coursework project.
 - Developed a Café POS system as part of coursework project.
 - Developed a POS and Inventory System for a dry goods store as part of a coursework project.
 - Developed a School Management System with modules for enrollment, grading, and faculty records as part of coursework project.
 - Developed a Flight Reservation Management System where users can reserve flight seats to a destination, integrated with a flight tracking API and PayPal payment API as part of a coursework project.
 - Developed a mobile application using React Native and Appwrite for ClassMates, a peer-to-peer matching tutoring system, as part of a capstone project.
-
